

DATA PRODUCT FEES BY APPLICANT CATEGORY

I. Analytic Enclave

The Analytic Enclave product is a managed, cloud-based analytic environment that enables secure access to the all-payer data, added-value data augmentation services and a set of analytic tools; refreshed quarterly with the newest data submissions. Access is by annual seat license.

Data Client Category	1-seat annual license*	2-seat annual license*
Reduced fee tier	\$40,000	\$47,500
Standard fee tier	\$60,000	\$67,500
Premium fee tier	\$100,000	\$107,500
Premium+ fee tier	Client-specific	Client-specific

* \$5,000 per seat license for each license beyond the initial 2 licenses. Fees are for one of the three standard WA-APCD datasets; higher fee is charged to customize a standard dataset

II. Data Extract

Per Member Per Year (PMPY) charge is assessed for each unique person in the dataset for the calendar year or other designated period. Data components include eligibility files, medical claims, dental claims, and prescription drug claims. The four-year historical data period (2014-2017) is a single time period for the purpose of applying the per person fee; a discounted per-person fee is charged for each annual period thereafter (e.g., 2019, 2020 etc.). Fees are for one of two standard WA-APCD datasets. A higher fee is charged to customize a standard dataset. Minimum fee is \$7,500.

Data Client Category	Fee per covered person (Per member per year)
Reduced fee tier	\$.01
Standard fee tier	\$.02
Premium fee tier	\$.04
Premium+ fee tier	\$.06

III. Custom Analytics Report

Typically, the custom analytics report fee ranges from \$7,500 to \$17,500 based on a \$175 hourly rate for report development. Following client request submission, a flat fee (e.g. \$1,200) is charged for the report design and development – this fee is credited to the client and deducted from the total cost of the report. If the client business requirements are sufficiently defined in its report request and a subsequent 1-2 hour design session then no up-front report design and development fee is assessed. The report design and development fee is not assessed if the client chooses not to proceed with the product purchase at the close of this initial 1-2 hour design session. The client must pay the full design and development fee if the product development work proceeds beyond the initial design session regardless of the client's product purchase decision.

These fees will be based on the client's data product requirements – the data client category fee tiering that is used for other WA-APCD products do not apply to custom analytics products.

IV. Release Upon Request Data Extract

The WA-APCD Release Upon Request Analytic Dataset is \$250 and there is an additional secure file transfer fee. The WA-APCD Release Upon Request Public Use File is free, however, the cost of the secure file transfer fee applies (inquire with the program).
